

Stream Trace Detailed Report

About This Report

This report provides information about the water bodies, streams, and streamflow gaging (measuring) stations along the routes that you trace using [Stream Report](#). It also identifies places (states, counties, and cities) your trace encounters as it moves downstream or upstream. Stream Report uses one million-scale map layers from [The National Map Small-Scale Collection](#).

The U.S. Geological Survey (USGS) maintains a [national network of gaging stations that measure streamflow](#) and other water characteristics.

Click [here](#) for more information about this report and how to download The National Map Small-Scale Collection data.
